 Juniperus (Juniperus)
INSTRUCTIONS FOR USE:
 Do not use or store near food or feed. Do not use on plants that are to be used for food or feed.
 1. There should be as little time as possible between the time of mixing cuttings, leaving with rooting powder and planting.
 2. Cuttings should be moistened before treatment, then excess moisture shaken off. Do not wet heavy cuttings.
 3. Do basal ends of cuttings into Hormone Rooting Powder.
 4. Shake off excess powder by tapping cuttings.
 5. Plant treated cuttings in rooting media, being careful not to rub off rooting powder when planting.
 Inhibition of root formation is possible by the use of too high a concentration of rooting powder. It is essential for successful propagation that the proper strength rooting powder for the species involved be chosen. Follow directions carefully. Timing and method of application, weather and crop conditions, nurseries with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of the material not in strict accordance with directions given herein.

STORAGE AND DISPOSAL:
 Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store in a cool, dry place. Always store pesticides in the original container. Store away from food and feed. Pesticide Disposal: Do not reuse or reuse the original container. Do not reuse or reuse the original container. Empty plastic or other containers for recycling if available. If empty plastic containers are available for recycling, they should be taken to a local solid waste agency or 1-800-CLEANUP for a local instructions. Never place unused product down any indoor or outdoor drain.
